SDI acquires remaining stake in distributor New Process Steel

By Rachel McGuire - Tuesday 19 August

US-based steel producer and recycler Steel Dynamics Inc (SDI) has acquired the remaining 55% stake in processor and distributor New Process Steel, the company said on Tuesday August 19.

"We have enjoyed a strong customer relationship with New Process since our founding," SDI chief executive and chairman Mark Millett said. "This acquisition expands our exposure to value-added manufacturing opportunities, while continuing to serve our other long-standing flat rolled steel customer needs."

The company has "entered into a definitive agreement" to acquire the remaining equity in Texas-based New Process Steel, which operates four processing plants in the US, including at SDI's flat rolled plants at Butler in Indiana, and Columbus in Mississippi, and two facilities in Mexico.

SDI previously acquired a 45% stake in New Process in October 2021.

"New Process has a reputation for high quality standards and strong customer relationships," Millett added. "With this next step, we believe that New Process will continue to have a number of opportunities for value-added manufacturing growth."

The Texas-based company currently employs 1,275 people and is SDI's largest flat rolled steel customer, according to a press release.

The announcement came after SDI saw a 4% decline in total steel shipments to 3.35 million short tons during the second quarter of 2025, led by a 7% decrease in flat rolled steel shipments.

Fastmarkets' most recent assessment of the steel hot-rolled coil index, fob mill US Midwest, was \$42.86 per hundredweight (\$857.20 per ton) on August 18.

UAE steel rebar, billet buyers wait for new local prices

By Serife Durmus - Tuesday 19 August

The market for steel billet and rebar in the United Arab Emirates was very slow over the past seven days because market participants were waiting for new local rebar prices to be announced, trade sources told Fastmarkets on Tuesday August 19.

Domestic rebar

Emirates Steel rolled over its price for rebar at 2,652 dirhams (\$722) per tonne ex-works for orders to be produced in August, unchanged since January.

The company sold rebar at 2,370-2,380 dirhams per tonne ex-works and re-rollers in the country sold rebar at 2,210-2,240 dirhams per tonne ex-works earlier in August.

The past week was very slow because the new local rebar prices had yet to be

announced.

Local rebar prices were typically announced after the 20th of each month in the UAE.

Some market participants expected an increase because of high production costs, while some expected a rollover again because of the summer slowdown in the market.

Fastmarkets' weekly price assessment for steel reinforcing bar (rebar), domestic, exw UAE, was 2,210-2,380 dirhams per tonne on Tuesday, unchanged week on week.

Rebar imports

No new rebar import prices were heard to the UAE during the past seven days because of the uncertainty on local prices.

Fastmarkets' weekly price assessment for steel reinforcing bar (rebar), import, cfr Jebel Ali, UAE, on a theoretical-weight basis, was \$605-610 per tonne on August 19, also unchanged week on week.

UAE steel HRC importers place new orders, prices increase

By Serife Durmus - Tuesday 19 August

Importers of steel hot-rolled coil in the United Arab Emirates placed new orders during the week ending Tuesday August 19, and prices increased week-on-week, trade sources have told Fastmarkets.

Market participants were waiting to see if recent high prices would become permanent. Price increases had started early in August but buyers were hesitant to book.

Stock levels of HRC were low in the country, however, so bookings were made, sources said.

UAE

Around 35,000 tonnes of HRC from Japan was booked at \$510-515 per tonne CFR during the past seven days.

India sold more than 25,000 tonnes of HRC at \$525-535 per tonne CFR.

China offered material at \$530 per tonne CFR, and buyers were bidding \$515-520 per tonne CFR.

Fastmarkets' weekly price assessment for steel HRC, import, cfr Jebel Ali, UAE, was \$510-535 per tonne on August 19, rising from \$500-530 per tonne on August 12.

Cold-rolled coil imports were offered from China at \$580-600 per tonne CFR.

No major deals were heard.

Fastmarkets' weekly price assessment for steel CRC, import, cfr Jebel Ali, UAE, was \$580-600 per tonne on Tuesday, unchanged week-on-week.

Hot-dipped galvanized coil of 1mm gauge and with Z275 coating was offered from China at \$720-740 per tonne CFR, unchanged week-on-week.

No major deals were heard.

Fastmarkets' weekly price assessment for steel HDG, import, cfr Jebel Ali, UAE, was \$720-740 per tonne on Tuesday, also unchanged week-on-week. <https://dashboard.fastmarkets.com/p/MB-STE-0123>

Saudi Arabia

China offered HRC in 1.2 mm gauge at \$560-565 per tonne CFR, unchanged week-on-week.

No major deals were heard.

Fastmarkets' weekly price assessment for steel hot-rolled coil, import, cfr Saudi Arabia (1.2mm gauge), was stable at \$560-565 per tonne on August 19.

European Commission consultation on steel trade measures finds local industry favors TRQs

By Julia Bolotova - Tuesday 19 August

The European Commission closed its public feedback consultations on future steel trade measures to replace the existing steel safeguard measures on Monday August 18, with adoption planned for the third quarter of 2025, Fastmarkets has heard.

The Commission launched the [consultation on trade measures on July 18](#) to address the negative trade-related effects of global excess capacity on the EU steel sector.

The consultation attracted 143 submissions, with the great majority from European companies and associations supporting long-term measures based on tariff-rate quotas (TRQs), Fastmarkets understands.

Several comments received in feedback have been published on the Commission's website.

"The [European Steel Processors Association] believes that a well-calibrated TRQ system, combined with robust anti-circumvention measures and traceability protocols, offers the most effective solution," ESPA (Belgium) said in its response.

"A new trade measure in the form of TRQs would not necessarily introduce new or additional administrative burden for downstream users following 8 years of safeguard TRQs," European steel industry association Eurofer said in its feedback.

Regional steel associations including UNESID, Italy's Federacciai, German steel association WV Stahl and Polish Steel association HIPH also supported TRQ measures.

European steelmakers SSAB, Hydnum, Arvedi, Dillinger, Celsa, ArcelorMittal, Tata Steel and others also spoke in favor of TRQ-based measures.

ArcelorMittal and Tata Steel also both advocated for a 50% tariff on out-of-quota steel deliveries, matching the current steel tariffs imposed by the US.

Switzerland-based companies, including Swiss Steel Holding (Swiss Steel Group) (Switzerland), supported the measures, but urged the Commission to exclude Swiss companies from the scope of new measures due to their "deep integration into European value chains."

By contrast, non-EU stakeholders raised concerns.

The government of Japan urged the EU to "cautiously consider the consistency of the measure with the international disciplines, including the

[World Trade Organization] Agreement."

South Korea's Posco International warned that "abrupt introduction of TRQs or additional duties may adversely affect steel procurement processes and impede major projects," and recommended implementation only after the current safeguard measures expire in mid-2026.

The Commission was expected to propose long-term TRQ-based measures in the third quarter of 2025, to replacing the current safeguards from July 1, 2026, and to provide equivalent protection against global overcapacity.

Trade sources that spoke to Fastmarkets believed that the new measures would most likely come into force sooner than July 2026, with one mill source saying: "The idea is for the new measures to be implemented as of January 2026."

Chinese CRC, HDG export prices fall on futures price retreat, low demand

By Zihuan Pan - Tuesday 19 August

Export prices for Chinese cold-rolled and hot-dipped galvanized steel coil moved lower in the week to Tuesday August 19, in the wake of a pullback in Shanghai steel futures prices amid an easing in speculative demand.

Trading for Chinese CRC and HDG exports, meanwhile, has been quiet in recent weeks, with traders and mill sources reporting few inquiries or bids from overseas buyers, sector sources told Fastmarkets.

Volatile Shanghai HRC futures prices, an uncertain market outlook, subdued demand and concerns over a potential crackdown on [steel being exported without paying value-added tax](#) made traders cautious, market sources said.

On the Shanghai Futures Exchange, the [most-traded contract for hot-rolled coil](#) - the substrate for both cold rolled-coil and HDG - has fallen for four in the past five trading days and ended at 3,416 yuan (\$476) per tonne on Tuesday, its lowest closing price in more than two weeks.

Cold-rolled coil

Fastmarkets' weekly price assessment for [steel CRC, export, fob China main port](#), was \$550-560 per tonne on Tuesday, down by \$5-10 per tonne from \$560-565 per tonne a week earlier.

Chinese mills offered CRC exports at \$560-580 per tonne FOB China on Tuesday, widening downward from \$565-580 per tonne a week earlier.

Market participants indicated that \$550-560 per tonne would be workable for CRC export transactions on Tuesday.

Fastmarkets' weekly price assessment for [steel CRC, domestic, ex-whs Eastern China](#), was 3,900-3,930 yuan (\$543-547) per tonne on August 15, up by 30-40 yuan per tonne from 3,860-3,900 yuan per tonne on August 8.

Hot-dipped galvanized coil

Fastmarkets' weekly price assessment for [steel galvanized coil, 1mm, export, fob main port China](#), was \$595-615 per tonne on Tuesday, down by \$5-15 per tonne from \$610-620 per tonne on Tuesday last week.

Fastmarkets' assessment is for HDG with zero-spangle zinc coating of 120 gsm (Z120).

Chinese mills offered HDG at \$560-570 per tonne FOB China for Z40 material and \$570-645 per tonne FOB for Z80 material on Tuesday.

These offers were equivalent to \$595-660 per tonne FOB for Z120 material, widening from \$610-645 per tonne FOB a week earlier, according to market

sources.

The sources indicated that \$595-615 per tonne FOB was workable for HDG export transactions on Tuesday, for Z120-equivalent cargoes.

Fastmarkets' weekly price assessment for **steel hot-dipped galvanized coil, domestic, ex-whs Eastern China**, which considers 80gsm zinc-coated zero-spangle HDG, was 4,150-4,200 yuan per tonne on Friday, widening upward by 20 yuan per tonne from 4,150-4,180 yuan per tonne a week earlier.

Chinese HRC prices dip on revised expectations on impact of production cuts

By Zihuan Pan - Tuesday 19 August

Chinese domestic spot steel hot-rolled coil prices edged lower on Tuesday August 19, amid revised expectations on the impact of cuts being implemented ahead of the upcoming Victory Day military parade, sources told Fastmarkets.

Speculation was rife on Monday that the environmental authorities in the top steelmaking hub of Tangshan in northern China had only orally ordered a handful of mills in the region to scale back blast furnace operations by 30-40% from August 31 to September 3.

The curbs are subject to change depending on the weather, but the period of cuts is shorter than previously expected, which will reduce the impact on overall steel production, sources said.

The central government's latest pledge to bolster the economy, meanwhile, failed to push steel prices higher on Tuesday.

On Monday, Chinese Premier Li Qiang chaired the ninth plenary meeting of the State Council and said that efforts to unleash consumption would continue, through systematically removing any restrictions and by moving faster to foster new growth drivers such as services consumption and other new types of consumption.

He also called for solid measures to consolidate the stabilization of the property market, according to a report by the state-backed Xinhua New Agency.

Domestic

Fastmarkets' price assessment for steel hot-rolled coil domestic, ex-whs Eastern China was 3,440-3,450 yuan (\$479-480) per tonne on Tuesday, down by 10 yuan per tonne from 3,450-3,460 yuan per tonne on Monday August 18.

<https://dashboard.fastmarkets.com/p/MB-STE-0154>

Export

Volatile Shanghai HRC futures prices, an uncertain market outlook and subdued demand, has muted trading in Chinese HRC exports in recent weeks, leaving Fastmarkets calculation of its daily **steel hot-rolled coil index export, fob main port China** unchanged at \$483 per tonne on Tuesday.

Small, privately-owned mills maintained their base price offers at \$480-484 per tonne FOB for 3.0-3.5 mm thick, 1,250-1,500 mm wide SS400/Q235-grade HRC on Tuesday.

Larger mills and state-owned mills, also kept their offers for similar cargoes unchanged day on day at \$480-510 per tonne FOB on Tuesday.

Traders told Fastmarkets they were still in "wait-and-see mode" given the weak overseas demand and **concerns over a potential crackdown on steel exported without paying value-added tax (VAT)**.

Green steel

Fastmarkets' assessment for **flat steel reduced carbon emissions, daily inferred, exw China** was 3,440-3,950 yuan per tonne on Tuesday, down by 10 yuan per tonne from 3,450-3,960 yuan per tonne on Monday.

This was assessed based on Fastmarkets' fortnightly price assessment of the **flat steel reduced carbon emissions differential, exw China**, which calculates the premium for flat-rolled reduced carbon emissions steel over products produced from the traditional blast furnace-based route and came in at 0-500 yuan per tonne on Friday.

Market chatter

"Euphoria over the production curbs [in the run-up to the Victory Day military parade in Beijing on September 3] has sharply eased, which led to the recent pullback in steel futures prices. But it's hard to say how much more downside the [steel] prices could see given the [production cuts] and an expected seasonal pick-up in demand," an industry analyst in eastern China said.

Shanghai Futures Exchange

The most-traded SHFE October HRC futures contract closed at 3,416 yuan per tonne on Tuesday, **down by 3 yuan per tonne from Monday's close of 3,419 yuan per tonne**.

Asian steel billet prices stable after recent spate of trades

By Paul Lim - Tuesday 19 August

Steel billet prices in Asia were unchanged on Tuesday August 19 amid thin spot liquidity after two trades the preceding week, sources told Fastmarkets.

Spot trading was limited, especially after the Philippines bought at least two cargoes last week of 5sp-grade billet.

It emerged in the week to Tuesday that a major reroller in the Philippines had bought 5sp-grade billets from China at \$465 per tonne CFR the preceding week. This was on top of the 30,000 tonnes of Vietnamese induction furnace-based billets bought by a group of Filipino rerollers at the same price.

Spot price estimates have remained the same so far.

Sentiment has been supported by news of China looking to implement strict steel production or blast furnace operating restrictions from August 20 to September 3 due to a major military parade to mark the 80th anniversary of Japan's surrender in World War Two.

Blast furnace operating rates are expected to be capped at 40%. Additionally, the stoppage of meltshop and hot rolling operations at all steelmaking facilities in Tangshan is to be implemented. Those rated "C" or "D" in the area are also expected to shut their operations.

Buyers in the region are wary of buying spot cargoes at higher prices, especially with futures prices falling in recent days, sources said.

Active market chatter that China was going to enhance checks on non value-added tax (VAT) exports from October onward via a new administrative system also added more noise to the market and caused steel mills and sellers to be more wary, especially if low-priced cargoes disappear from the market.

A major Indonesian blast furnace-based steelmaker maintained its offer for billet with November-laycan at \$450 per tonne FOB.

Bids from end users were at \$460 per tonne CFR southeast Asia, while offers were at \$465-467 per tonne CFR Manila, and at \$470 per tonne CFR Indonesia.

"Sellers are less likely to drop offers now after the recent trades and sentiment continued to be supported by fundamentals," a trader source in southeast Asia told Fastmarkets.

Chinese steelmakers have kept their offers at \$450 per tonne FOB, although buyers are aiming for around \$440 per tonne FOB.

Fastmarkets' daily price assessment for **steel billet domestic, exw Tangshan, Northern China** was 3,020 yuan (\$420.37) per tonne including value-added tax on Tuesday, down by 30 yuan per tonne from 3,050 yuan per tonne on Monday.

Hot-rolled coil news

Midwest HRC price rises amid expectations that demand will grow in September

By Rachel McGuire - Tuesday 19 August

Midwest hot-rolled coil prices rose from the prior session despite limited spot market activity and continuing sluggish demand, according to market participants.

Fastmarkets' daily **steel hot-rolled coil index, fob mill US Midwest** was calculated at \$43.20 per hundredweight (\$864 per short ton) on Tuesday August 19, up by 0.79% from \$42.86 per cwt on Monday August 18, and up marginally from \$43.17 per cwt a week earlier on August 12.

Inputs were collected in the range of \$40.00-43.25 per cwt in the buyer sub-index, representing general assessments of the spot market.

Inputs were rolled over in the seller sub-index due to a lack of liquidity.

Heard in the market

The hot-band market remained tepid during the slower summer months, when demand usually remains depressed, sources said. Buyers may continue to attempt to suppress spot prices so that they fall in line with September contract levels (around \$800-820 per ton), one distributor told Fastmarkets.

Yet some market participants were optimistic that demand could rebound going into September as the summer season ends.

Mills reported upcoming outages, which could limit future inventories, sources said. Current domestic steel supply is ample, according to market participants, after US producers increased output to supply the market while the 50% Section 232 tariffs curb import levels. But outages going into the fall, which could extend lead times, could lead to increased prices, according to the distributor.

Lead times are around three to five weeks, sources said.

Quote of the day

"We are not seeing any customers that are busy. Most are buying just what they need for the orders on hand," a source told Fastmarkets. "Every week is becoming more like [groundhog] week. I still think we won't see any movement upward until September, once summer is over."

Market participants told Fastmarkets rerolling mills in Tangshan restricted production during the week for better air quality ahead of September 3 military parade, which caused weaker demand for billet and put downward pressure on billet prices.

Fastmarkets' twice-weekly price assessment for **steel billet, import, cfr Manila** was \$465 per tonne on Tuesday, unchanged from August 14.

Fastmarkets' corresponding price assessment for **steel billet, import, cfr Indonesia** was \$465 per tonne on Tuesday, unchanged from August 14.

European HRC prices steady amid muted trading; mills keep pushing for higher offers

By Julia Bolotova - Tuesday 19 August

European prices for hot-rolled coil were little changed amid muted trading; mills managed to achieve higher prices in transactions, but HRC still traded below target offers for the fourth quarter, sources told Fastmarkets on Tuesday August 19.

In Northern Europe, target offers for HRC with delivery in October were looming at €590-610 (\$689-712) per tonne ex-works, but no transactions at the mentioned levels have been reported so far.

On August 19 several sources told Fastmarkets that a leading European steelmaker increased HRC prices for the third time over the past month, up by €20 per tonne to €630 per tonne ex-works or delivered for November lead times. But the mentioned steelmaker didn't return Fastmarkets' request for comment before publication.

"Most likely they booked their capacity [for September-October] and pushed for higher prices on the last bits," a source familiar with the matter suggested.

Nonetheless, German and Benelux suppliers managed to achieve higher prices in transaction during August, with the market rebounding from the rock bottom levels registered in July.

Notably, buyers' estimations of tradeable values were reported at €560-580 per tonne ex-works, with transactions reported within the mentioned range lately.

Some sources claimed that €550 per tonne ex-works was still achievable for large tonnages at some suppliers.

"Producers managed to recover some €20-30 per tonne from rock bottom prices, which is a positive sign, but the increase is not driven by improved demand — rather some precautions due to expectedly lower imports," a buyer in Germany said. "New import offers for delivery in the first quarter of 2026 will fall under CBAM [Carbon Border Adjustment Mechanism], and uncertainty also surrounds the early replacement of safeguard measures."

Additionally, the European Commission ended its consultation on future trade measures to replace steel safeguards on Monday August 18, with **most submissions from European companies and associations supporting long-term measures based on tariff-rate quotas (TRQs)**, Fastmarkets understands.

"This entire bullishness of the EU mills is fueled by expectations of much lower imports as of 2026," a trading source said.

Sources claimed that this regulatory ambiguity was curbing buyers' appetite for imports and, therefore, driving interest for domestically produced coil.

Fastmarkets' calculation of the daily **steel hot-rolled coil index domestic, exw Northern Europe** was €571.25 per tonne on August 19, down by €3.96 per tonne from €575.21 per tonne on August 18.

The Northern European index was up by €0.24 per tonne week on week and up by €19.58 per tonne month on month.

Meanwhile, the Italian market was still in "holiday mode" with most sources

still absent.

Fastmarkets' daily **steel hot-rolled coil index domestic, exw Italy** was €537.50 per tonne on Tuesday, stable day on day.

The Italian index was down by €2.50 per tonne week on week, but up by €12.50 per tonne month on month.

Steel plate news

US domestic plate prices decline in static market

By Melissa VanDervort - Tuesday 19 August

Plate prices in the US fell on Tuesday August 19, with market participants reporting that slow spot trading and ongoing weak demand are contributing to downward price pressure in the domestic plate market.

Fastmarkets' weekly assessment for **steel cut-to-length plate carbon grade, fob mill US** was \$52 per hundredweight (\$1,040 per short ton) on Tuesday, down by 1.89% from \$53 per cwt on August 12.

Inputs were collected in a range from \$50-53 per cwt, representing offers and general assessments of the spot market.

The domestic plate market is static, sources told Fastmarkets, with sluggish demand and tepid spot activity contributing to a downward price trajectory.

"Plate prices have steadily declined over the last couple of months," a buyer said. "I continue to see slowness in the steel [plate] market. I am not hearing a lot of cheers from the buyers and sellers [in the market]. I don't know if the effect of President [Donald] Trump's on, off, or new tariffs are taking their toll."

"[It has been a] pretty quiet and boring week [and] not much has changed [in the plate market]," a Midwest distributor said. "Demand is not improving, and we don't see much change [happening] in the next few months."

Domestic mills are willing to make deals for high-tonnage orders to move material, while many hesitant buyers continue to sit on the sidelines,

according to market participants.

"Demand is slow, and most mills are willing to negotiate pricing," a second buyer source said.

A second distributor shared a similar view, saying, "I think prices will stay the

same for September, just because that's usually the end of the slow season and [domestic mills] may see how the market is and make back-door deals if the market is slow and the mills want to grab tons."

Lead times were reported at three to four weeks, sources said.

Rebar news

China's domestic rebar prices fall on rising inventories

By Jessica Zong - Tuesday 19 August

China's domestic rebar prices fell on Tuesday August 19, on the back of bearish sentiment among market participants and a rapid increase in spot market inventories, sources told Fastmarkets.

The rebar stock in the spot market rose over the past few weeks, with the pace of increase accelerating this week due to weak demand, sources said.

Local authorities in northern China had ordered many construction sites to suspend activities ahead of the September 3 military parade, which led to a dip in rebar consumption in Beijing and surrounding provinces, according to sources.

Adverse weather conditions in east and south China also led to softer demand for rebar, sources said.

A trader based in Shanghai said the rebar stock has reached 240,000 tonnes on Tuesday in the city, up by 60,000 tonnes from 180,000 tonnes ten days earlier. A second trader in another major market Hangzhou noted that the rebar stock in the city was above 700,000 tonnes in the first two days of this week, up by 100,000 tonnes from 600,000 tonnes a week earlier.

Most buyers stayed on the sidelines, with plans to wait for further development in prices before buying more cargoes, the second Shanghai-based trader said.

Fastmarkets' daily price assessment for **steel reinforcing bar (rebar) domestic, ex-whs Eastern China** was at 3,150-3,170 yuan (\$439-442) per tonne on Tuesday, down by 20-40 yuan per tonne from 3,170-3,210 yuan per tonne on Monday.

Market Chatter

"I doubt the rebar inventories will maintain this fast pace of increase, given that rebar production had recorded a month-on-month and year-on-year decrease in July. The production rates in the past few days do not show significant increase either," an industry analyst said.

The rebar output was 15.18 million tonnes in July, down by 9.5% from 16.58 million tonnes in June, and down by 2.3% from 15.54 million tonnes in July 2024, according to data from the National Bureau of Statistics.

Billet

Fastmarkets' daily price assessment for **steel billet domestic, exw Tangshan, Northern China** was 3,020 yuan per tonne including value-added tax on Tuesday, down by 30 yuan per tonne from 3,050 yuan per tonne on Monday.

Shanghai Futures Exchange

The most-traded October rebar futures contract on the Shanghai Futures Exchange closed at 3,126 yuan per tonne on Tuesday, down by 29 yuan per tonne from closing price of 3,155 yuan per tonne on Monday.
